Medior Frond-end Developer and Open Source Enthusiast

About me

My name is Koen, located in Amsterdam. I am looking for a new job. Most of my career so far has been focused on front-end technologies, I would like to continue my development on that in the short-term, and I would also like to get some experience with backend technologies in the long run. I am detail oriented. I enjoy getting things 'right' the first time, and I enjoy getting to know new and innovating technologies.

Skills

- Frontend Experienced with VUE.JS, bootstrap, tailwind and twig.
- Drupal Experienced with Drupal configuration and drupal-specific frond-end development
- C# Minimal experience in the C# and .NET framework. In combination with micro services, TSQL and webtechnology.
- Operating Systems Experienced with Linux (since 2008), Windows and OSX

Experience

- aug 2022–current **Web Development, Synetic, Haarlem**
Web development within a agency with a focus for enterprise customers. Gained experience in Drupal, Twig, Tailwind and VUE.js. I also safeguarded our ISO27001 certification. I learned to work in a dynamic environment with often shifting priorities.
- feb 2022–aug 2022 **Graduation Internship, Synetic, Haarlem**
I did a research to see if the webcomponents standard could be used for creating a framework-independent library of standard components to be used for multiple customers.
- mar 2020–sep 2020 **Junior C# Development, eVerbinding, Woerden**
C# Backend development for automated invoicing and administration
- sep 2019–feb 2020 **Web Development, Kroot.dev, Utrecht**
VUE.js webapplication development in a startup. Technology involved: html/css/javascript, VUE.js
- dec 2017–aug 2019 **Software Development, EY, Amsterdam**
Gained experience as an software developer in an corperate culture. My focus was on usecase-specific modifications to our internal workflow management product. Technology involved: C#, ASP.NET(MVC), html/javascript, T-SQL

feb 2014–jun 2014 **Internship Software Development**, *Heemskerk Innovative Technology*, Nieuwegein
Internship, investigation of intergration ROS (linux based real time middelware), haptic robot controller with windows-based robot simulation. The purpose was to be able to seamlessly switch between controlling an simulation or controlling an actual robot.
Technology involved: RedHat Linux, C++.

Education

2021-2022 **Technical Computer Science**, *Hogeschool van Amsterdam*, Amsterdam
Finishing up studies

2020-2021 **Audio Engineer**, *Instituut voor Audio- en Belichtingstechniek*, Utrecht

2012-2016 **Technical Computer Science**, *Hogeschool van Amsterdam*, Amsterdam
Computerscience with an focus on embedded software development.
