Summary

My name is Koen, I am a frontend developer based in Amsterdam, passionate about building innovative and efficient web solutions. While I want to continue growing in frontend in the short term, I would also like to grow into a fullstack role in the long term. I am detail-oriented, enjoy getting things 'right' the first time, and love learning about new technologies.

Projects

OpenContinuity March 2025 - present

<https://github.com/gorgabal/OpenContinuity/>

Founded a free and open source webapp for monitoring continuity on a movie set. I am the sole developer, doing both the frontend and the backend.

Technologies involved: PWA, RxDB, React, Vite

Experience

SchouteICT.nl October 2025 - present

Founder

Amsterdam

<https://schouteict.nl>

Setting up a company to level up my skills and to do freelance work.

Currently involved in building a webapp for movie production purposes.

Synetic

Augustus 2022 - Februari 2025

Web Developer

Haarem

<https://synetic.nl/>

Web development within an agency that focuses on enterprise customers.

Gained experience in Drupal, Twig, Tailwind, and Vue.js. I also protected our ISO 27001 certification. I learned to work in a dynamic environment with frequently shifting priorities.

Synetic

Februari 2022 - Augustus 2022

Graduation Internship

Haarem

<https://synetic.nl/>

I conducted research to determine if the Web Components standard could be used to create a framework-independent library of standard components for multiple customers.

eVerbinding

March 2020 - September 2020

Junior C# Development

Woerden

<https://everbinding.nl>

C# Backend development for automated invoicing and administration

Kroot

September 2019 - Februari 2020

Web Development

Utrecht

Interests

Free and open source software

Linux

<https://kroot.dev/>

Vue.js web application development within a startup.

Technology involved: HTML, CSS, JavaScript, Vue.js

EY

December 2017 - Augustus 2019

Software Developer

Amsterdam

<https://ey.com>

Gained experience as a software developer in a corporate culture. My focus was on use-case specific modifications to our internal workflow management product.

Technology involved: C#, ASP.NET(MVC), HTML, JavaScript, T-SQL

Education
