Koen Schoute

Software Development

✉ koen@schouteict.nl ☎ +31622503051
📍 Amsterdam, North Holland, Netherlands
🌐 <https://schouteict.nl>

Summary

My name is Koen, I am a frontend developer based in Amsterdam, passionate about building innovative and efficient web solutions. While I want to continue growing in frontend in the short term, I would also like to grow into a fullstack role in the long term. I am detail-oriented, enjoy getting things ‘right’ the first time, and love learning about new technologies.

Projects

OpenContinuity October 2025 - present
Founded a free and open source webapp for monitoring continuity on a movie set. I am the sole developer, developing both the frontend and the backend.

Technologies involved: PWA, RxDB, React, Vite
<https://github.com/gorgabal/OpenContinuity/>

Experience

SchouteICT.nl Amsterdam
Founder October 2025 - present
Freelance web development for small companies. Currently involved in building a webapp for movie production purposes.
<https://schouteict.nl>

Synetic Haarem
Web Developer Augustus 2022 - Februari 2025
Web development within a dynamic agency. I developed web experiences for enterprise customers within the Drupal framework, as well applied technologies such as Twig, Tailwind and Vue.js. I protected to our ISO 27001 certification through applying checks and designing risk-countermeasures, while also assisting the auditors. Synetic also transitioned to autonomous teams during my time there, which allowed me to increase my involvement within the company.
<https://synetic.nl/>

Synetic Haarem
Graduation Internship Februari 2022 - Augustus 2022
I conducted research to determine if the Web Components standard could be used to create a framework-independent library of standard components for multiple customers.
<https://synetic.nl/>

eVerbinding Woerden
Junior C# Development March 2020 - September 2020
C# Backend development for automated invoicing and administration
<https://everbinding.nl>

Kroot Utrecht
Web Development September 2019 - Februari 2020
Vue.js web application development within a startup.

Technology involved: HTML, CSS, JavaScript, Vue.js
<https://kroot.dev/>

EY Amsterdam
Software Developer December 2017 - Augustus 2019
Software development in the .NET framework. I was responsible to apply customer-specific workflow modifications to our custom workflow management software. The main focus of the software was to facilitate internal audits.
Technology involved: C#, ASP.NET, HTML, JavaScript, T-SQL
